SYNOPSIS

Anni Christi 1637.

Sivè

Diarium Astronomicum, & Prognosticon Astrologicum, & Meteorologicum, ad annum primum ab Intercalari. 1637.

BIBLIOTHECA · BODLEIANA

Contriving, besides the generall state of the yeare, the daily disposition and inclination of the aire, according to the severall positions and configurations of the celestiall bodies. Also the times of Conjunctions, greater and lesse; and Aspects Lunar and mutuall.

Faithfully supputated according to Art, for the use of those that are residing towards the end of the 8 climate of the world; situate in the North-temperate Zone: The Pole Artique surmounting the Horizon 51 degrees 34 minutes.

Per JOANNEM WYBERDUM, *Philophysicum, Astronomophilon.*

Ubi cœlestia negliguntur, ibi terrestria parùm prosperè succedunt.

OXFORD,
Printed by *William Turner*, Printer to the famous Universitie. 1637.
Cum Privilegio.

9

Vulgar notes of this yeare.

CHARLES our gratious King began his reigne over great Brittaine the 27 of *March, Ann. Dom.* 1625. and hath reigned 12 yeares compleat the 26 of *March* this yeare 1637. But the 27 day we write *Anno Regni* 13°.

VIVAT REX, & REGINA.

Veneris stella venusta ac luculenta cùm antegreditur Solem, Φωσφόρος *&* Ἑωσφόρος *Græcè; Lucifer Latinè dicitur: Cùm verò subsequitur & ab occasu refulget; vesper, vesperugo,* & Ἕσπερος *appellatur.*

The golden Planet *Venus* is orientall, or our bright morning starre, going before the Sunne, (as a messenger to bring newes of his comming) from the beginning of the yeare to the 5 day of *July*: At which time she becomes occidentall, or our glittering evening starre following the Sun, and appearing gloriously after his departure from our Horizon; and so she continues to the end of the yeare. She is moved in her orbe, according to the succession of the signes all this yeare.

A perfect table of the 4 Termes and their Returnes, with the Essoyne dayes, Dayes of Exception, Returna-brevium, and Dayes of Apparance this yeare. 1637.

Hilarie Terme begins *Januarie* 23, ends *February* the 13.

Returne dayes, or dayes of Essoyne	Dayes of Exception	Returna Brevium	Dayes of Apparance
Octab. Hilar. *Jan.* 20	21	23	24
Quindena Hil. *Jan* 27	28	30	31
Crast. Purif. *February* 3	4	6	7

Iniquissimam pacem justissimo bello antefero.

Of the foure ſeaſons of this yeare, and firſt of winter, which courſe ſeemeth agreeable to the courſe of nature, becauſe then the Sun beginneth to returne unto us, and therefore we may fitly derive the beginning of his circuit from thence.

WInter the firſt quarter of the yeare Aſtronomicall, but the laſt, according to our Engliſh accompt, taketh beginning, when the Sun entreth into the firſt ſcruple of the Tropicall, cold and dry ſigne Capricorne; which happeneth the laſt yeare upon the 11 day of December, betweene 5 and 6 of the clock in the morning; the Sun then making his greateſt Meridionall declination from the Æquator, and cauſing the ſhorteſt day and longeſt night with us in the yeare: viz. in our Meridian of London; the day 7 houres 24 minutes; the night 16 houres 26 minutes.

Of the Spring.

THe Spring is the moſt comfortable quarter in all the yeare, and of nature warme and moiſt, the Sun then drawing neare to our Zenith or verticall point, and commeth towards the ſtars of a warme nature, and then the Eaſt windes blow, diſperſing the ſuperfluous humours, making the earth apt to bring forth all things for the good and comfort of man. This quarter taketh beginning, when the Sun entreth the firſt minute of the Equinoctiall and fiery ſigne Aries, which happeneth this yeare (by Aſtronomicall calculation of the Suns motion, according to the moſt exact celeſtiall obſervations) the 10 day of March at 5 houres 47 minutes and 47 ſeconds in the

the morning, by the meane or equall time, but at 5 houres 47 minutes, and 7 ſeconds: the true or apparent time: the day and night being then of equall quantity through the whole world. The 21 grade and 56 minutes of the moiſt ſigne ♎ now aſcending in our Horizon; The Sun, Mercury and Mars are collocated, in domo vitæ, or the Angle of the Horoſcope; Jupiter oppoſing the Sunne in the angle of the Weſt, the Moone and Saturne in the cuſpe of the 11 houſe, and culminating, or aſcending to the angle of mid-day, &c. and many other things to be obſerved in theſe poſitions and configurations of the planets and other ſtarres, from whence divers Aſtrologicall conjectures may be drawne, whereof there is no place to ſpeake.

Of the Summer.

THe Æſtivall Solſtice, or Summer quarter begins this yeare, (according to Aſtronomy) the 11 day of June, neare 10 a clock before noone, the Sun then entring the firſt point of the Tropicall ſigne Cancer, making his greateſt Septentrionall declination, and cauſing thereby the longeſt day and ſhorteſt night with us in the yeare: viz. at London, the day 16 houres 26 minutes; the night 7 houres, 24 minutes.

Of Autumne.

AUtumne, the fourth and laſt quarter Aſtronomicall, but the third according to our Engliſh accompt, begins this yeare (according to Tycho Brahe) the 12 day of September, 24 minutes and 56 ſeconds after midnight, at which time Helios entreth the firſt minute of the Equinoctiall and airy ſigne Libra; againe coequating the day artificiall with the night in all places of the world; viz. betweene Sun-riſing and Sun-ſetting: and from thence to Sun-riſing againe.

The two great Luminaries or principall Lights of the world, ſhall appeare deficient in light 3 times this yeare; viz. The greater of them twice, happening (amongſt other things) by the interpoſition of the opacous body of the leſſer, in a viſible conjunction; and the leſſer once, by reaſon of the earth (inter alia) being placed betwixt them both in a diametrall oppoſition: They being at all their times of their defection in the inferiour Hemiſpheare (I meane that halfe of the heaven which we ſee not,) and therefore will not be viſible with us; ſo we ſhall not need to feare their effects: Eclipſes enim ut nil nocumenti minantur iis regionibus quæ illis non ſubjiciuntur; ita illis non ſunt ſubjectæ iſtæ regiones in quibus non conſpiciuntur: Et Luminarium deliquia, maximè verò ſolaria, (ſecundum Aſtrologos) magnos variósque producunt effectus; viz. vel in aqua vel terra: in hominibus, beſtiis, avibus, piſcibus, &c. and ſuch effects as theſe: viz. peſtes, bella, fames, ſterilitates, ſeditiones, naufragia, inundationes, and many other whereof here is no place to ſpeake; but ſometimes in one kinde, and ſometimes in another, greater or leſſer, and of greater and leſſer continuance, according to the quantity and duration of the Eclipſe; the qualities and figures of the ſignes in which the defects happen, and the places of the ſtarres both erraticall and fixed, ſurmounting in the ſame: and Angle of heaven and cardinall ſigne; as alſo good or bad events: Hoc ſumitur à natura ſtellarum dominantium, quæ ſunt in præcipuis locis, & earum commixtione inter ſeſe, & cum iis locis, in quibus eſſe conſpiciuntur; ut ait *Ptolomæus*: But becauſe none of theſe Eccliples will happen in our Horizon, and I alſo being tyed to ſo ſmall a roome, doe therefore ceaſe to make further deſcription of them.

THE
Anatomie of Mans bodie, as the parts thereof are governed by the 12 Celeſtiall ſignes.

♈ Aries Head and face.

♉ Taurus Necke and throat.
♋ Cancer Breaſt, ſtomack & ribs
♍ Virgo Bowels & belly.
♏ Scorpio Secret members.
♑ Capricor. The knees.

♊ Gemini Armes and ſhoulders.
♌ Leo Heart and backe.
♎ Libra Reines and loynes.
♐ Sagittar. The thighs
♒ Aquarius The legges

♓ Piſces The feete.

Note that the Letters, a and p, put after the Conſunctions and Aſpects of the Planets in the fifth columne under every moneth, doe ſhew the time of the ſame: A ſtanding for ante or before noone, and P for poſt, or after noone. Example: againſt the 5 day of January are ſet theſe characters: ☌☉☾.11.a. ſignifying a Trine Aſpect of the Sunne and Moone to happen at 11 a clock before noone; and the 11 day □♂☾.4.p. a Quadrate Aſpect of Mars and the Moone, at 4 after noone.

Saturne is a morning ſtarre, hę oppoſeth the Moon the 28 day at 6 morn. ♃ orientall & with ☽ the 6 day, at 3 morn. ♂ occidentall & with ☽ the 19 day, at 2 afternoon. ♀ orientall and with ☽ the 12 day, at 11 before noone. ☿ orientall, & with ☽ the 15 day about 1 afternoon. The 7 day ♄ with ☿ at 9 night: & the 19 day ☉ & ♀ conjoyne about midnight.

The Moone hath 30.

Bifronted Janus doth attendance give
As Porter at the gate into the yeare:
And all that paſſe thereat muſt aske him leave,
Yet will I not, although I enter there.
All that like him two wayes at once doe looke,
I care not if their aſpect miſſe my booke.

Phœbus now climing up our Hemiſphere,
Begins anew his yearely race to runne,
And caſt his warmer beames upon us here,
And to the right ſide of the world doth turne:
Now Ver approacheth; ready to revive
Thoſe things which Hyems did of life deprive.

Now Tellu's poares (which long with Hyems cold
Were ſhut) doe open; will not ſo abide;
Young tender haire ſprouts up in place of old
Her nakednes in every part to hide.
The heavenly dew, which now on her diſtils,
With all good things her plentifully fils.

And now Dame Flora in her rich array
Invites us forth her gardens for to trace,
Cupid that Meddow God calls us away,
To view her beauty, ere Phœbus it deface.
Well: let us goe; and both their mindes fulfill,
And pick her Lillies and her Daffydills.

Jove, Mars and Titan will us to expect
Some horrid sounds, fulgurities and heat.
Bright Phosphoros and Pyrois meane to raise
Some suddaine storme, which Phænon qualifies:
And these two linkt together tell us newes
Of Cupids wanton sports which them ensues.

The Moone hath 30.

And twice this moneth that faire maid doth embrace
Her royall master, whom she doth attend;
Whereby the limpid heav'n she doth deface,
Appearing to the eyes of mortall men.
And what of this is like to be the end,
But suddaine strifes and teares that will descend.

The Moone hath 30.

Now Syrius getting up, doth wonders great,
If all that hath beene ſaid of him be true;
I wiſh that I may ſhun his raging heat,
And gladly would his influence eſchew:
To uſe purgations now, it is not good,
As ill a thing for to diminiſh blood

The Moone hath 29.

Behold what friendly Aſpects doe attend
The comming in of this our ſecond Spring:
Unto us mortals they glad tidings ſend
Of wholeſome ſeaſons which they ſtrive to bring.
But marke this moneth what windes will raiſed be,
Eſpecially by Jove and Mercurie.

The Moone hath 30.

Dame Cynthia in her old age ſeemes to frowne,
And caſt a ſad aſpect upon her Mates;
Whereby ſhe ſendeth but cold comforts downe
To welcome in this moneth, now place it takes.
But thus man raviſht is with admiration
Whoſe thoughs are fix't on heavenly contemplation.

The Moone hath 30.

A friendly ſeaſon now is like to be,
As favourable Aſpects doe portend:
Bright Jove's and Venus Trine ends temperately
The yeare: God grant we may our lives ſo ſpend,
And bleſſedly we here may live and die,
So live and reigne with him eternally.

Of Ianuary.

THe firſt day the ſtarres called *Orions Girdle*, doe ariſe veſpertine, troubling the aire; cauſing South-weſt winds. The 2 & 3 daies, little mutation of aire. The 4 day ſomewhat a cold aire, *cum nubibus diſperſis.* The 5 day, inclining to moyſture. The 6 day, temperate aire. The 7 day, cold windes overcaſting the aire with clouds, and like to ſnow: ♂ ♄ ☿ . 9 *p.*

☾ Laſt quarter the 8 day being Sunday, about one of the clocke in the morning, ☿ then reigning: apt for moiſture. The 9 day, cold, cloudy and moiſt. The 10 and 11 daies doth *Lucida Coronæ* produce by a veſpertine ſetting. The 12 day *Aſellus* riſeth coſmicall, and ♂ ☿ ☾ . 11. *a turbidum tempus cauſat ac maris æſtum adauget.* The 13 day *Præſepe* ſetteth coſmicall. The 14 day cold and moiſt weather. The 15 day △ ☉ ♃ . 3. *a. remiſſi frigoris,* but ſome wind.

● New moone the 16 day being monday, 3 quarters paſt 5 in the morning: ☉ ruler of the time. Like to be moiſt weather moſt of this quarter, but warme onely; the latter end ſomewhat more faire. The 20 day the South *Aſellus* riſeth chronicall, which (with *Ptolomy*) bringeth wet weather. The 21 day ✶ ♂ ♄ . 4. *p.*

☽ Second quarter the 23 day being monday, 12 min. paſt 3 after noone; ☿ ruling: cold and windy. The 24 day *ad nubes nivoſas prona.* The 25 day, temperate aire: Towards night raine like. The 26 day warme and moiſt. The 27 and 28 dayes, *Aer frigidior cum pluviis aut nivibus,* and the 28 day *Syrius* riſeth veſpertine. The 29 day ſomewhat more temperate and faire.

● Full moone on monday the 30 day, a quarter before 9 in the morning, ♄ governing: Eagle riſeth coſmicall cauſing wet. The 31 day ☿ enters ♓: *varia & inconſtans,* chiefly tending to moiſture.

Some

Some ſay, if the Sun ſhine the 12 day of *January*, there ſhall be much winde: Others prognoſticate of S. *Pauls* day, ſaying: If the Sunne ſhine it is a token of a happy yeare; if raine or ſnow, indifferent: if miſty, great dearth: but if it thunder, there will be great windes and death that yeare.

February.

THe firſt day cold and cloudy, threatning ſnow. The 2 day a more temperate aire, *Regulus* riſeth chronicall. The 3 day he ſetteth coſmicall, of whom *Ptolomy* ſaith, The cleare ſtarre in the heart of the Lyon beginning to ſet, the North wind bloweth with often raine: *Cardanus* ſaith, it raiſeth the South-weſt winds. The 4 day ☌ enters ♈. The 5 day raine or ſnow.

☾ Laſt quarter the 6 day being Monday, 9 minutes after 9 in the night, ☉ beares ſway: inclining to moyſture. The 7 day indifferent faire, *nubes crocea & rubre cælo ſpargantur.* The 8 day windy and dry. The 9 day the *Dolphins* taile doth ſet veſpertine, which (*Ptol.* ſaith) bringeth windes and ſnow, and the more raine, the windes being South. The 10 and 11 dayes ſomewhat cold, tending to raine or ſnow. The 12 day *varia & inconſtans*; moſt apt for moiſture. The 13 day ✶ ♄ ☿ . 11. *p.* cold windes threatning ſnow.

● New moone the 14 day being Tuſeday, at 10 in the night, ☿ reigning: wet weather. The 15 and 16 dayes moiſt windes. △ ♃ ☿ . 2. *a.* The 17 day ☌ ☽ . 11. *a. Siccius tempus adducit, nubes varicolores cælo ſpargit & aerem calefacit.* The 18 and 19 cold and cloudy, tending to ſnow or raine. The 20 day ☿ enters ♈, ☽ with the 7 ſtars.

☽ Second quarter the 21 being Tuſeday, at 11 in the night, ☿ ruling: warme and moiſt weather. The 22 and 23 dayes, *flant valide venti; nam ſit Apertio*

portarum ad ventos magna; turning at last to moisture. The 24, 25, and 26 daies, cold and cloudy with snow or raine. The 27 day somewhat fairer.

● Full moone the last day being Tuesday, 20 minutes after 9 at night; ♂ governing: *Apertio portarum aquarum lenis*.

Some say, Thunder upon *Shrove-tuesday* (which seldome happens) foretelleth wind and store of fruit & plenty; the Sun-beames being early abroad: others affirme, that so much as he shineth that day, the like he shineth every day in Lent.

March.

THe first day cold and moist weather, till towards night, and then somewhat a more cleare aire with winds, and so till the 2 day about noone; then againe *Aura videtur frigida & subnubila*, tending to snow or raine. The 3, 4, & 5 dayes. not much dissenting *Apertio portarum*. The 6 day *Vindemiator* riseth vespertine, bringing North winds with frost. The 7 day, winds clearing the aire.

☾ Last quarter the 8 day being Wednesday, 40 minutes after 5 in the evening, ♃ Lord of the time: somewhat windie & cold. The 9 day cold weather. The 10 day *Arcturus* riseth chronicall, causing tempests: *Cardanus* saith at the vespertine rising of this starre, Swallowes be seene, and the spring cometh. *Stadius* saith, at the vespertine setting of this star, Swallowes depart by multitudes, and at his vespertine rising come againe: & this rising bringeth South-west winds and by West, blowing commonly 12 dayes with raine or haile, ending in the West: (and thus I have observed it.) Herewith agree *Ptol. Plin. Strad. Columella*, &c. but especially being furthered with the radiation of the Moone or *Mars*. The 11 day ☌☉♃. 5. a. *Flatus ventorum salubrium parit*,

parit, pulchramque ſerenitatem & caliditatem temperatam; ☿ *cum crure* ♍. The 12 day ☌ ☉ ♂ . 11. a. windy and dry. The 13 day ☍ ♃ ☿ . 11. p. temperate aire. The 14 and 15 dayes, cold and inclined to moiſture.

● New moone the 16 day being Thurſday, at 10 before noone, ☿ ruling: Like to be temperate warme weather all this quarter, now and then ſome gentle ſhowers, and ſome wind. The 20 day ☽ with the *Bulls eye*. The 21 day *Spica virginis* ſetteth coſmicall. The 22 day, ☽ with great Dogge.

☽ Second quarter the 23 day being Thurſday, a quarter before 6 in the morning; ♃ domineering, cloudy and apt for moiſture. The 24 day ☽ with the *Aſelli*; cold and moiſt aire. The 25, 26, and 27 dayes, ſomewhat more temperate and warme. The 28 day overcaſt with cloudes and cold. The 29 day indifferent weather.

● Full moone the 30 day being Thurſday, 40 minutes paſt 10 before noone; ☿ *Dominatrix*, warme and moiſt winds. The 31 day △ ♄ ☿ . 9. a. ſnow or raine. Some ſay, ſo many miſts in *March*, ſo many hoare froſts after *Eaſter*.

April.

THe firſt day wet weather, and ſo till the 2 day about noone, then more faire and dry. ☍ ♃ ☿ 12. The 3 day winds overcaſting clouds, ☾ with *Hercules Head*. ✶ ♄ ☿ 0. The 4 day ☿ enters ♈, ſomewhat more temperate: in the night faire and cleare with windes. The 5 and 6 dayes, *Apertio portarum ad ventos valida*. ☍ ♃ ☿ . 2. a. The 6 day □ ☉ ♄ . 4. a.

☾ Laſt quarter on Friday the 7 day, halfe a quarter before 1 afternoone, ♂ beares ſway. The whole quarter like to be darke, cold, and moiſt weather, onely the 12 day more faire and cleare.

● New moone the 14 day being Friday, neare 9 at night, ♂ ruling: temperate weather. The 15 day indifferent faire. The 16 and 17 dayes ♄ *Aura frigida ac humida.* The 18 day, *Augustus terminus Meiadum*, one of the 7 ſtars riſeth coſmicall; the other following a little after cauſing Weſt windes. △ ♄ ♃. 8. ☌. The 19 day gentle warme ſhowers, ♂ with right ſide of *Perſeus*. The 20 day more cold and moiſt.

☽ Second quarter the 21 day being Friday, halfe an houre after noone, ♂ ſurmounting: pleaſant weather, but turning to raine, if not thunder at night. The 22 day the South part of *Lucida Lancis* ſetteth coſmicall, often provoking ſhowers of raine. The 23 day ſpringing ſhowres. The 24 day □ ♄ ☿. 11. ☌. The 25 day □ ♄ ♀. 11. ☌. Theſe denote cold, windy, & wet weather. The 26 day not diſſenting. The 27 day ♂ enters ♊, ☿ enters ♉, cold and cloudy.

● Full moone the 28 day being Friday, neare one a docke in the night, ☿ governour: pleaſant raine. The 29 day ♀ enters ♉. The 30 day, *Aer calefactus: nubes croceæ & rubræ cælo ſparguntur, fortè pluvias ſecum ducentes.*

Some ſay, if it raine upon *Aſcenſion* day, (which ſometimes falleth in *April*) it doth betoken ſcarcity of all kinde of food for cattell, but being faire, it ſignifieth plenty.

May.

THe firſt and ſecond dayes temperate weather and cleare. The 3 day cloudy and apt for moiſture. The 4 day *Syrius*, or *Canis major* ſetteth veſpertine; Tempeſt from the South, and North-Eaſt and by North, (as hath beene obſerved) and *Stadius* ſaith, if the Full moone happen within two dayes before or after, it prognoſticates blaſting to corne and other flowers. The

5 day

5 day *ad nebulas turbidas prona.* The 6 and 7 *Hyades* begin to set; the South-wind blowing with raine: So *Ptolomy* speaketh of the setting of *Pleiades*, or the 7 stars. △ ☉ ♃ . o. upon the 6 day.

☾ Last quarter the 7 day being Sunday, halfe a quarter past 5 in the morning, ☉ *Dominator*: and ☾ culminating. The 8 and 9 dayes inclining to wet. The 10 day *Pleiades descendunt chronicè*, causing South windes, which (with *Ptolomy*) at last turne into the West. △ ♃ ♀ . 2 *a.* The 11 day the *Buls eye* setteth: Inclined to moisture, and so the 12 day. The 13 day ☌ ☉ ☿ . 7 . *p.* clouds overcasting the skie.

● New moone the 14 day being Sunday, at 5 in the morning, ☉ Lord of the time: Much variety of weather this quarter; the most part cloudy, windy, and moist. The 17 day ♀ with the 7 stars. The 18 day *Procyon* setteth *Heliacall*. The 19 day △ ♃ ♀ . 8 . *a.* ☽ with the Lyons heart. △ ♄ ♀ . 4 . *p.*

☽ Second quarter the 20 day being Saturday, halfe an houre past 8 in the evening, ☿ rulers temperate weather. The 21 and 22 dayes, cold windes and cloudy, yet keeping dry. The 23 day the Eagle riseth chronicall; ☽ with the Virgins Spike. The 24 day the 7 stars rise cosmicall; Raine or haile with some wind. The 25 day △ ♄ ♃ . o. The 26 day little dissenting. The 27 day the *Buls eye* riseth cosmicall, causing raine; ☽ neare the *Scorpions heart*.

● Full Moone the 28 day being Sunday, a quarter before 4 after noone, ☉ Lord of the houre: hot and drie. The 29 and 30 dayes, *Aer calidus, cum nubibus varicoloribus.* The 31 day ☾ neare the *Dragons heads* somewhat inclining to moist weather. Some say, the Sunne shining upon the 25 day; wines shall prosper well.

June.

THe first day, *Oriuntur Pleiades Heliacè*. The 2 day *remissio caloris* with some raine, ☿ with *Albabor*. The 3 day not unlike to it, □ ♃ ☌ ☽. threatning thunder with raine. The 4 day tending to moisture.

☾ Last quarter the 5 day being Monday, at 8 in the evening, ☿ ruling: Raine like. The 6 day *Canis minor* setteth vespertine; Raine or haile: □ ☉ ♄. 6. a. causing a strong port, opening in the heavens. The 7 and 8 dayes, cold and wet. The 9 day the aire moist towards noone, the ☾ passing through a very moist mansion. The 10 day ☌ enters ♉: ☾ with *Aldebaran*. The 11 day inclined to moisture.

● New moone on Monday the 12 day, halfe a quarter past high noon. ☌ ☽ ☿. *culminant*. ☌ ♄ ☿. o. warme and moist windes. The 13 and 14 dayes not much differing. The 15 day ✶ ♃ ☿. 2. 8. *insurgunt venti; Apertio tenis*. The 16 day *Arcturus* setteth cosmicall, making the aire intemperate; and ☍ ☉ ☌. 4. 6. *adjungit imbres, tonitrua, fulgura, & grandines multis in locis*. The 19 day ☿ enters ♊. *Turbulentiam tempestatum frigidarum, pluviarum, aut grandinum plurimis in locis excitat*. The 18 day faire and cleare.

☽ Second quarter the 19 day being Monday, at 6 in the morning, ☽ *Dominatrix*: hot weather and like to thunder: ☽ with the *Virgins Spike*. The 20 day hot weather. The 21 day the left side of *Orion* riseth cosmicall, raising the West winds. The 22 day, *occidit Hedus brevis Australis*. ☌ with *Albabor*. The 23 day ☿ with him. The 24 day the aire apt for moisture towards noone, the ☽ then passing through a moist mansion. The 25 day ☍ ☌ ☿. 5. a. *Ruit cælum imbribus: Apertio portarum aquarum valida*; More cleare in the evening with winds driving away clouds. The 26 day

temperate: ☽ *cum cauda Cygni.*

● Full moone the 27 day being Tueſeday, 7 minutes after 7 in the morning; ☉ ruler of that houre: Temperate aire. The 28, 29, and 30 dayes, temperate, faire, and cleare, with pleaſant gales of wholeſome windes.

Some ſay, if it raine the 24 day, Hazell nuts doe not proſper.

July.

THe firſt day indifferent weather. The 2 day riſeth *Orions Girdle*, and is a criticall day: for if it raine this day (as hath beene anciently, I know not how well, obſerved) it doth continue ſo, oftentimes for 4 weekes: *Stadius* ſaith, if *Jupiter* be aſpected with *Mars*, *Mercury*, or the *Sun*, at this riſing (which now he is not) great tempeſt is portended at the riſing of the great Dog, and foreſheweth North-eaſt windes and by North; corruption of the aire, with the riſing of the *Eteſian* windes. The 3 day, *ſerenitas cum ventis propitiis & nubeculis albis toto cœlo diſperſis*, till the 4 day towards night: Then ☌ ☉ ♀ . 7 . *p. triſtiorem cœli faciem adducit cum tonitruis & imbribus.*

☾ Laſt quarter the 5 day being Wedneſday, 2 quarter before 4 in the morning, ☾ culminating. ☌ ♄ ♀ . 6 *a.* ☌ ☾ ♄ . 9 . *a.* Theſe denote very raw, cold, and moiſt weather like to enſue: *Apertio portarum valida* for the 6 and 7 dayes. The 8 and 9 *ad ſereniorem aerem proclive cœlum cum ventis mitibus*, ☾ neare *Buls eye.* The 10 day ✶ ♃ ♀ . 5 . *p.* ☾ with *Alhabor.*

● New moone on Tueſday the 11 day, 7 minutes after 7 in the evening: ☌ ☉ ♀ . 8 . *p.* Inclined to moiſture, and thunder threatned. The 12 day ☌ ♄ ♂ . 10 . *p. cœlum cauſat horriſonum noctu, cum pluviis aut grandinibus*: ♃ enters ♎. The 13 day *Lucida Coronæ* ſetteth

achronically. ☌☉♃. 0. The 14 and 15 dayes a temperate cleare aire. The 16 day ♂☍☿. 5. p. *Serenum & flatulentum*, some showers in the evening; *& fortè tonat*. The 17 day ☽ with *Alramech* and *Azimech*.

☽ Second quarter the 18 day being Tuseday, a quarter past 6 in the evening: ☽ culminating. The 19, 20, 21 and 22 dayes, gentle coole weather, *cum pluviis levibus & mitibus*: and the 21 day ♂♄☿ *ferè*. The 23 day the North *Asellus* setteth vespertine, at which time (with *Ptol.*) the North-east and by East windes blow, as fore-runners of the *Etesian* windes: *Cardanus* saith, These windes as fore-runners of the rising of the great Dogge, blow 8 dayes before; with which *Stadius* agreeth. The 24 day ☽ is savage. The 25 day ♂ enters ♌, fervent heat, turning to raine or haile, if not thunder.

● Full moone the 26 day being Wednesday, a quarter past 10 in the night, ♂ governing: Inclining to moisture. The 27 and 28 dayes, some gentle showers of raine. The 29 day hot weather, and like to thunder in the night. ☌♃♂. 10. p. The 30 day ♀ neare *Regulus*. The 31 day *Syrius*, or *Canis major* riseth *Heliacall*: Both these dayes are like to be faire.

Some say, if it be faire 3 Sundayes before *S. James* day, corne will be good; but being wet, corne withereth.

August.

THe first day *Syrius*, or *Canis major* riseth cosmicall: *Cardanus* saith, at the rising of this starre all living creatures be troubled; and that it is scarce possible that drynes and sickneſse should not be. *Stadius* recounts many more enormities, as troubling of wine in cellars, dogges going mad, fluxes of the seas and waters, death of fish s with the extremity of heat; especially if *Mars* or *Jupiter* be in fiery signes: (as now *Mars* is in the most

moſt fiery ſigne.) *Diaphanes* ſaith, if at the riſing of the great Dogge with the Sunne, the Moone be in ♈, (as now ſhe is) it doth preſignificate raine and tempeſts; in ♉, ſtormes; in ♊, peſtilence; in ♋, drines; in ♌, burning heate; in ♍, ſhowers often, with untimely birth of children: in ♎, great drynes; in ♏, plagues; in ♐, or ♑, raine and tempeſt; in ♒, drought and ſickneſſe; in ♓, raine the enſuing yeare. But theſe, *Stadius* ſaith, be not knowne to him for truthes; for he holds them more ſubſtantiall that be taken, *Ex varijs commixtionum cauſis.* The 2 day ☿ enters ♌, inclining to heate.

☾ Laſt quarter the 3 day being Thurſday, halfe an houre after 11 before noone, ☿ ruling. The Eagle ſetteth coſmicall: the South-weſt and by Weſt windes blowing with great heat. *Cardanus* ſaith, it raiſeth the *Etefian* windes, which (with *Ptolomy*) doe continue 21 dayes. The 4 day *remiſſio caloris*, with ſome gentle ſhowers; ☾ with *Aldebaran*. The 5 and 6 dayes, *ſerenitas cum ventis calidis*; *Apertio portarum lenis.* ☀☌♄ ☿ .9.*p.* The 7 day *Aura cum pſecade, aut grandine*, ☾ with the leſſer Dogge. The 8 day *Regulus* riſeth coſmicall: *Calor immenſus, fulgura, ac tonitrua minata ſunt, & nubes varicolores ſpargunt̃r*, eſpecially at night, and the day following.

● New moone the 10 day being Thurſday, halfe a quarter paſt 3 in the morning, ♂ ruler: This new moone (among other things) promiſeth a hot and dry ſeaſon for the moſt part of the moneth; eſpecially this quarter: helping the painfull and diligent husbandman to gather the fruits of his coſt and labour.

——ut proprio condęret horreo,
Quicquid fertilibus verritur areis.

The 13 day the great Dogge riſeth *Heliacall*, which limits the beginning of the *Grecian* yeare; and of this

this rising there be divers observations: If then the heaven be cloudy and darke (as some have said) it signifieth a heavie time with plagues, &c. but being faire and cleare, it is good. Also the 13 day the *Dolphin* setteth cosmicall, commonly bringing raine, and beginning the Autumne, according to *Ptolomy*.

☽ Second quarter the 17 day being Thursday, a quarter past 9 before noone, ☉ supreame: More remisse heat this quarter, with some coole blasts, and mild showres. The 20 day △ ♄ ☿ . ☌. The 24 day S. *Bartholomewes* day: if the wind change not the following night, the vulgar hold it good: *Stadius* recounts tempests with haile, &c. to come from the West and North-west part in the end of *August*, which often doe hurt.

● Full moone the 25 day being Friday, a quarter before 1 after noone, ♂ governing: a pleasant temperature. The 26 and 27 dayes, a temperate aire. The 28 day *Tristior crudescet cœli facies cum pluviis aut grandinibus*. The 29 day ☿ enters ♎, coole weather. The 30 day ☿ neare the Lyons heart, ☾ *cum capite Algol*. The 31 day ☌ ☉ ☿ . 12. These like the 29 day.

September.

☾ Last quarter the first day being Friday, at 6 in the evening: This is counted a criticall day; if it doe not then raine (as hath beene observed) the rest of Autumne is like to be dry. △ ♄ ☿ . 2. *p*. The 2 day △ ☉ ♄ . 3 *a*. causing a Port opening to the winds. The 3 and 4 dayes cloudy and apt for moisture. The 5 day temperate warme weather. The 6 day ☌ ☌ ☾ . 1. *p* ☌ ♃ ☿ . 3. *p* *Caliditatem & bonam aeris temperiem remittunt; & nubes croceæ & rubræ cælo sparguntur*. The 7 day not unlike to it; ☾ with the Lyons taile.

● New moone the 8 day being Friday, a quarter bef

before 1 after noone; ♂ Dominator of the time: Temperate weather. The 9 day *ſerenum & flatulentum.* The 10 and 11 dayes ſome coole ſhowers; with *Atracti.* The 13 day is Equinoctiall: winds from Weſt, North-weſt. ☐ ♄ ☿ . 7. *a.* The 14 and 15 dayes faire and cleare; *Aer proclivis in flatus; nam ſit apertio porrum ad ventos valida;* ☌ ♃ ☿.

☽ Second quarter the 16 day being Saturday, at 4 in the morning; ☿ governour: Temperate weather. The 17 day *Lucida Coronæ* riſeth coſmicall [*Ptol.*] winds turne, troubling the ſeas with winterly weather. The 18, 19, and 20 dayes, cold and cloudy. The 21, 22, 23, *Aer ad nubes humidas pronus.*

● Full moone on Sunday the 24 day, halfe a quarter before 2 in the morning, ☿ ruling: A pleaſant temperature. The 25, 26, 27 dayes, *Aura pro majore parte, videtur futurâ ſubnubila cum frigiditate.* The 28 day ſomewhat warmer, and the 29 day ☌ ☉ ♃ . 2. *a. aerem illucit ſerenum, vix ſine ventorum ſalubrium flatu: ☽ cum Spica virginis.*

☾ Laſt quarter the laſt day being Saturday, halfe an houre paſt midnight: ☿ reigning.

Some ſay, ſo many dayes old as the Moone is on *Michaelmas* day, ſo many flouds will happen that winter; by which account (if it be true) there will be 21 flouds this winter.

October.

THe firſt day a cloudy and cold aire. The 2 day ☐ ☉ ♄ . 10. *p.* inclined to moiſt weather; ♃ with the Virgins Spike: and ſo all the reſt of this quarter *ad ſcuritatem proclive cum pluviis frigidis.* The 4 day ☌ ♂ ☿ . 4. *a.* ☌ ☿ ☋ *ferè.*

● New moone the 7 day being Saturday, neare the 2 a clocke in the night, ☽ *Dominatrix:* moiſt winds.

winds. ✶ ♂ ☿ . 4. p. ✶ ♄ ☿ . 7. p. ☽ with *Spica* ♍ cold and cloudy tending to moisture; *Venti consurgunt nubiferi*, and so till the 12 day about noone. Then *Aer tale factus; nubes croceæ & rubræ cælo sparguntur, ☽ cum cauda Scorpij.* The 10 day ✶ ♄ ☿ . 1. a. The 11 day △ ♄ ♂ . 4. p. ♂ neare **Benenatz**. The 13 and 14 dayes temperate weather.

☽ Second quarter the 15 day being Sunday, halfe an houre after midnight, ♂ ruling; cold weather like to ensue: The Dragons taile setteth vespertine; after this day we must expect no more warmnes, and therefore the *Germanes* call it **den Galen Sommer**. The 16, 17, 18, and 19 dayes, *ad ventos acres & nubiferos proni sunt.* The 20 day □ ♄ ♃ . 3. p rainy and windy. The 21 day the East windes blow with raine. The 22 day cold weather, with frost or snow.

● Full moone the 23 day being Monday, 12 min. past 2 after noone: *Admodum frigidus, obscurus & pluviosus aer*; all this quarter.

☾ Last quarter the 30 day being Monday, 20 min. after 8 in the morning, ♄ begins his reigne: faire weather like to ensue. The 31 day temperate weather.

If leaves now hang on the trees, some say, it portends a cold winter, or many caterpillars.

November.

THe first day cold weather and cloudy, yet keeping faire. The 2 day a more warme aire. The 3 day ✶ ♄ ☿ . ♂ ☉ ☿ . *Aer frigidus, ventosus & subobscurus.* The 4 day the Scorpions heart setteth vespertine; which (with Astrologers) is a critieall day: ✶ ♃ ☿ . 7. p *major aeris temperies, cum ventis mitibus & nubisugis.* The 5 day the Dog setteth bringing Southernly weather. The like is to be judged of *Orion* which setteth about this time.

● Ne

● New moone the 6 day being Monday, at 4 after noone, ♂ governes: wet weather. The 7 day cloudy and like to raine. but warme; ☽ with Lyons heart. The 8 day *Succulæ* or *Hyades* ſet coſmicall; raine like: ☽ going to 7 ſtarres. The 9 day *ad nebulas turbidas prona.* The 10 day the 7 ſtarres ſet coſmicall; if then the heauen be cloudy (as ſome have obſerved) it denunciates a wet winter: but if dry, a ſharpe winter. *Pliny* ſaith, *Vergiliarum & Pleiadum occaſum, terræ marique turbidum eſſe.* The 11 day *Aer nebuloſus & frigidus*; ſome guſts of wind clearing the aire in the evening. The 12 and 13 dayes indifferent weather; ſomewhat windy.

☽ Second quarter the 14 day being Tuſeday, a quarter paſt 8 at night, ☿ chiefe: ſomewhat windy. The 15 and 16 dayes, *Aer ad nebulas humidas pronus.* The 17 day ſomewhat more faire and cleare: In the night, *nubes croceæ & rubræ cælo ſpargunter.* The 18 and 19 dayes temperate. The 20 day cold and cloudy, and towards noone the moone will be in a moiſt manſion. The 21 day □ ♂ ☿ . 3. ☌. *Remiſſio frigoris* with raine: *Apertio portarum ad aquas*, ☽ with the *Buts* ☍.

● Full moone the 22 day being Wedneſday, 40 minutes after 1 in the morning, ☿ ruling; The windes raiſe. The 23 day temperate. The 24 day *Arcturus* ſetteth *Heliacall*, cauſing often raine (with *Cardanus*) ☌ ♄ ☿ . 5 . ☌. The 25 day *ſerenitas cum ventis.* The 26 day towards noone the ☾ goeth through a moiſt manſion, making the aire apt for moiſture. The 27 day *ſerenitatem proclive cælum cum ventis.*

☾ Laſt quarter the 28 day being Tuſeday, a quarter before 6 in the evening, ♂ Lord of the houre; Froſt and ſnow: ☌ ♄ ☿ . 0. The 29 and 30 dayes, cold weather.

December.

December.

THe first day *Aer subnubilus*, yet warme: and in the evening more cleare with gentle blasts. The 2 day □ ♃ ☿ .2.p. *Serenum & flatulentum*, ☿ *cum corde* ♏. The 3, 4, and 5 dayes *venti nubiferi*, yet keeping faire; and the 3 day ✶ ☉ ♂ .5.p. The 6 day is *Dies Nicholai*; of which *Cardanus* saith thus: *Proximi septem dies à Bruma, totidemque antè, rarò ventis infestantur. Stadius* saith, about the Brumall Solstitiall, there doth happen *Halcyon*, or most tranquill weather.

● New moone the 6 day being Wednesday, a quarter past 10 before noone, ♄ ruling: indifferent weather. The 7 day temperate. The 8 day cold and cloudy: The ☽ in a moist mansion towards noone. The 9, 10, 11 dayes, *Aura turbida ac humida*; and the 9 day □ ♄ ♂ .2.a. The 12 day ✶ ☉ ♃ .2.a. *flatus ventorum salubrium, aer fit calidus & temperatus.* The 13 day *Tristior cœli facies; venti oriuntur humidi.*

☽ Second quarter the 14 day being Thursday, a litle past 3 after noone, ☉ *Dominator*: Faire weather. The 15 and 16 dayes darke weather, like to snow: The 16 day in the evening more warme; *nubes croceæ & rubræ cœlo sparguntur.* The 17 and 18 dayes cold: The 18 day ☽ with the 7 stars. The 19 day ♂ enters ♏, ☽ with the left foot of *Orion* The 20 day ☌ ♃ ♂. ✶ ♃ ☿. ✶ ♂ ☿. These denote doubtfull weather.

● Full moone the 21 day being Thursday, a quarter before 1 after noone, ♄ governes: cold raine. The 22 day cold and cloudy. The 23 day *Aer calefactus, nubes varicolores dispersæ.* The 24 and 25 dayes more cold and like to snow. The 26 about noone the ☾ in a temperate mansion. The 27 day, *venti consurgunt nubiferi.*

☾ Last quarter the 28 day being Thursday, a qua

ter before 6 in the morning, ♂ ruler of the time: ☾ *culminant*: moiſt winds. The 29 day ♀ enters ♓, temperate aire; *nubeculæ albæ diſperſæ*: change of aire at night, and like to raine; and ſo the 30 day. The 31 day △♃ ♀ .2.a. indifferent [illegible]her; ſomewhat inclined to moiſture.

Some ſay, if *Chriſtmas* day come in the New moone, it is a token of a good yeare, and ſo much the better, by how much it is nearer the new moone: The contrary happeneth in the decreaſe. Thus ye ſee how in every month there are ſome old obſervations which the vulgar take great hold on, accounting them for truths; being grounded upon no reaſon: All which I (for my part) referre to the judgement of them that are obſervers thereof; & ſay with *Stadius*, Theſe are not knowne to me for truthes; for I hold them more ſubſtantiall that be taken, *Ex varijs commixtionum cauſis*: and may further ſay and conclude with the prudent Poët;

Fœlix qui potuit rerum cognoſcere cauſas.

Hardly doe we gueſſe aright at things which are upon earth, and with labour doe we finde the things that are before us; but the things that are in heaven, who hath ſearched out? *Wiſd.* 9 16.

Qui ſapit, ille animum fortunæ præparat omni;
Prævisumque poteſt arte levare malum.

FINIS.
